Easy Installation

Practical and quick installation without
requiring extra hardware and equipment

Labeling

You no longer need to manually write the
tank address information!
Practical labeling with custom produced
labels that are resistant to -196° degrees.
Labeling can be done using materials such
as straw, vial, leaf etc.

RFID Chip

All Cryo samples can be identified with
RFID chips that are durable in -196°

Full Capacity

Using the tanks in their full capacity, real
time monitoring
